Dear Dr. Henney, EXTREME

I am writing to express my concern over the
FDA's regulation of genetically engineered
(GE) food. I request that the agency's
current policies be changed, and I support
all the points in docket #00P-1211\CP1

☑ All GE foods should be labeled so I am
informed and have a choice. *to be healthy*

☑ GE foods should not be assumed to be
"generally recognized as safe" and should
have mandatory pre-market safety testing *immediate*

☑ There should be a moratorium on GE
foods until long-term studies show they are
safe for human health and the environment.

(Additional Personal Comments:) *The 2nd highest cancer
in the country is bowel cancer —
hope you or your family don't get
it or any other side effects*

Name *Regina Bennetts*
